

Pre Sale : Bonus 4: Simple 5-Minute Morning Mobility Routine

Ignite your metabolism, ease joint stiffness, and prepare your body for the day.

How to Use:

Perform each of the 5 movements below for 60 seconds (30 seconds per side where applicable). Focus on slow, intentional movement and deep breathing.

[\(Click Video\)](#) 5 MIN DAILY STRETCH Video - An everyday, full body routine

01 Thoracic Spine Rotation (T-Spine)

Start in a tabletop position (hands/knees). Place one hand behind your head. Rotate your elbow up towards the ceiling, following it with your gaze. This is key for posture and reducing back stiffness. ****(30 sec per side)****

02 Cat-Cow Flow

Move slowly from Cow pose (belly down, head up) to Cat pose (belly up, chin tucked). Synchronize the movement with your breath. Inhale for Cow, exhale for Cat. Excellent for spine flexibility. ****(60 seconds)****

03 Active Hip Flexor Stretch

Kneel in a lunge position. Gently tuck your pelvis forward (do NOT arch your back) to feel the stretch in the hip of the back leg. Squeeze your back glute. Release and repeat. ****(30 sec per side)****

04 Ankle/Calf Circles

Sit on the floor or lie on your back. Lift one leg and rotate your ankle clockwise and counter-clockwise slowly and deliberately. Important for lower body stability and blood flow. ****(30 sec per ankle)****

05 Overhead Arm Circles

Stand tall with feet hip-width apart. Perform slow, controlled arm circles (forward and backward) with arms straight. Use the full range of motion to open the shoulders and chest. ****(30 sec each direction)****
