

Pre-Sale Bonus 6 : Quick-Start Meal Prep Checklist

Your Stress-Free, One-Hour Weekly Prep Plan

This blueprint shows you how to prepare 3 days of healthy, whole-food meals in just 60 minutes. Before you start, ensure all your groceries are washed and your containers are ready!

The 60-Minute Efficiency Block

Proteins: The Oven & Stove Start (20 min)

1.

- ☐ ****Load the Oven:**** Season chicken/turkey breasts or salmon. Place in oven at 375°F (190°C).
- ☐ ****Boil & Simmer:**** Start a pot of hard-boiled eggs and/or one large pot of quinoa/brown rice.
- ☐ ****Quick Wash:**** While oven/stove runs, wash all your fresh vegetables.

Veggies: Chop, Slice, and Roast (15 min)

2.

- ☐ ****Roast Prep:**** Chop cruciferous veggies (broccoli, Brussels sprouts). Toss with oil and spices and add to the oven alongside the protein.
- ☐ ****Fresh Prep:**** Chop lettuce, cucumbers, peppers, and onions for salads or snacks. Store these dry in a large container.
- ☐ ****Starch Check:**** If using sweet potatoes, wrap in foil and place in the oven.

3.

- ☐ ****Remove & Cool:**** Take proteins, roasted veggies, and grains out of the oven/off the stove. Let cool slightly (10-15 min max).
- ☐ ****Sauce Prep:**** Mix up one large batch of healthy dressing (e.g., olive oil, apple cider vinegar, Dijon). Store separately.
- ☐ ****Snacks:**** Portion nuts, seeds, and berries into small, grab-and-go bags/cups.

How to Keep Your Lettuce FRESH for Weeks! [\(Click Video\)](#) Storage: Lock & Load (10 min)

4.

- ☐ ****Portion Meals:**** Fill each meal container with a portion of protein, a portion of grain/starch, and a large portion of cooked or raw vegetables.
- ☐ ****Refrigerate:**** Seal all containers tightly and place in the fridge. Do not store dressing or sauces directly on salads.
- ☐ ****Clean Up:**** Wipe down the counter and put away dishes. 60 minutes is complete!

Remember: The key to fast meal prep is overlapping tasks—always have something cooking while you're chopping or portioning!
